DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1 2 and 4, are drawn to an image recording apparatus for use in an inspection system with imaging means for imaging operation of manufacturing equipment, which initially stores image data in a temporary storage portion and when a signal from an inspection means is received the temporary stored image data are read out and stored in a permanent storage means, classified in class 348.
 - II. Claim 3 is drawn to an image recording apparatus, creating one frame of image data from one field by interpolation in such a way that the top end-line and the bottom end line of the frame image are not displayed, classified in class 382.
- 2. Inventions an image recording apparatus for use in an inspection system and an image recording apparatus creating one frame of image data from one field by interpolation are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed.

The inventions are distinct, each from the other because of the following reasons:

Art Unit: 2613

The claimed are directed to different features of the overall system.

3. Because these inventions are distinct for the reason given above and the search required for group 1 is not required for group 2, restriction for examination purpose as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
